Jontek and Vivatec form partnership for NHS PASA Telecare National Framework Agreement

Jontek is pleased to announce that the Answer-Link 3G Telecare Response Centre is now available through the NHS PASA Telecare National Framework Agreement (NFA), from our partners, Vivatec.

John Mooney, Managing Director of Jontek said “This is great news for many of our customers and prospects who would much prefer to purchase systems through an approved framework agreement saving them both time and costs in the procurement process.”

Andrew Hall, Managing Director of Vivatec added “We were hugely impressed with Answer-Link’s flexibility and cost effectiveness. Our partnership with Jontek marks the completion of our strategy to bring a complete range of best of breed products and services to NHS PASA Telecare NFA users.”

The acceptance by NHS PASA of Answer-Link 3G under the 2008 Annual Review process means that the Centre is available through the Telecare NFA from 1 April 2008 with no further requirements for tendering by purchasers.

2 April 2008

Notes to Editor

1. Jontek is the largest independent supplier of Telecare Response Centre in the UK.

2. Vivatec is one of the 13 companies on the NHS PASA National Framework Agreement (NFA) for Telecare.

3. To benefit from the PASA NFA terms and conditions, contracts will be placed with Vivatec, not Jontek directly.

4. The partnership between the two companies means that public sector bodies and Registered Social Landlords in the UK can purchase the Answer-Link 3G Centre from Vivatec, under the terms of the NFA without needing to go through a formal tendering process.
