

Using Technology for Quality Care

Manchester | Kings House Conference Centre | 09 July 2019

9.30am to 1.15pm followed by lunch, exhibition and networking

Understanding how technology can help achieve outcomes for individuals as well as quality local social care markets.

As a council I want to shape an innovative vibrant, and sustainable social care market which meets the needs of our residents.

As a care provider I want to provide quality, personalised and efficient care to our clients (and their families) in the right place at the right time.

As a supplier I want to offer person-centred solutions that meet the needs of individuals and requirements of commissioners and care providers.

We are holding a series of free, half-day workshops for commissioners, care providers and technology suppliers to support the sector with embracing technology in care.

The purpose of the workshop is to learn from local areas where councils, providers and suppliers are working together to use technology to support quality of care. There will be an opportunity to hear about new digital developments, meet suppliers and hear from others who commission, deliver or work in social care.

Providers and commissioners please invite each other, and people who use your services to this workshop.

Speakers

The workshop will be co-chaired by a strategic council representative and care provider representative.

Delegates will have the opportunity to hear from a local commissioner, care provider and technology supplier who will share how they're working together to use technology to support quality care.

There will also be a speaker from Care Quality Commission who will give the regulator's perspective on digital social care.

Funding Opportunity 2019/20

In 2019/20 care providers (in collaboration with councils) will have the opportunity to bid for funding to support digital ways of working.

Find out more about how to apply at the workshop.

Who should attend?

- Those who are directly involved in or have an interest in commissioning and provision of health and social care – particularly heads of commissioning and commissioning leads.
- Registered managers of care providers operating in the region (providers with and without contracts in place with councils are welcome).
- Care providers delivering a range of services are encouraged to attend – care homes, home care agencies, supporting living organisations etc.
- Social care technology suppliers.

Please note that this event is for councils and care providers operating in the North West region.

If you'd like to know where else this event is taking place in 2019/20 please contact socialcaredigital@local.gov.uk.

Registration

To book your place, please register [here](#).

If you are a technology supplier interested in exhibiting at this event, please contact info@techforcare.co.uk.
